

THE SUMMER PROJECT AT LAB

for Rising 7th through 12th Graders

SUMMER 2021: HOME FRONT: LIFE IN AMERICA DURING WORLD WAR II

The Lab School's successful Summer Project for Rising 7th through 12th Graders is a transformative way to learn; it offers students opportunities to develop 21st Century skills such as working collaboratively and taking ownership of ideas with all the ups and downs that come with bringing them to fruition. Focused on group process and individual skill development, the schedule changes daily, making this camp experience dynamic and unlike a typical day of the school year.

This summer's project explores the dramatic economic and cultural changes of the 1940s, a time of unprecedented production and mobilization by American

civilians in war time, through an exciting, challenging immersion into arts and academics.

Over the course of our four-week adventure, students will participate in a plethora of arts-based and academic activities, culminating in an overarching digital project. Exploring literary, social, political, and cultural contexts of this important time in American history will help strengthen their academic, social, and problem-solving skills.

Whether your primary interests are in the visual or the performing arts, you will have the opportunity to contribute to all aspects of this summer's project, while developing and applying academic skills in reading, writing, math, and the arts.

The emergence of COVID-19 has forced The Lab School, like other schools around the world, to reevaluate nearly every aspect of its educational practices. Our top priority is the safety of our students and our faculty and staff. Lab School has enacted a number of protocols to reduce the risks to our community. Details will be shared prior to the beginning of the summer session.

"There is one front and one battle where everyone in the United States — every man, woman, and child — is in action, and will be privileged to remain in action throughout this war. That front is right here at home, in our daily lives, and in our daily tasks."

—PRESIDENT FRANKLIN
DELANO ROOSEVELT
